Ladies or Tigers?

Many of you are familiar with Frank Stockton's story "The Lady or the Tiger?," in which the prisoner must choose between two rooms, one of which contains a lady and the other a tiger. If he chooses the former, he marries the lady; if he chooses the latter, he (probably) gets eaten by the tiger.

The king of a certain land had also read the story, and it gave him an idea. "Just the perfect way to try my prisoners!" he said one day to his minister. "Only, I won't leave it to chance; I'll have signs on the doors of the rooms, and in each case I'll tell the prisoner certain facts about the signs. If the prisoner is clever and can reason logically, he'll save his life—and win a nice bride to boot!"

"Excellent idea!" said the minister.

THE TRIALS OF THE FIRST DAY

On the first day, there were three trials. In all three, the king explained to the prisoner that each of the two rooms contained either a lady or a tiger, but it *could* be that there were

tigers in both rooms, or ladies in both rooms, or then again, maybe one room contained a lady and the other room a tiger.

1 • The First Trial

"Suppose both rooms contain tigers," asked the prisoner. "What do I do then?"

"That's your hard luck!" replied the king.

"Suppose both rooms contain ladies?" asked the prisoner.

"Then, obviously, that's your good luck," replied the king. "Surely you could have guessed the answer to that!"

"Well, suppose one room contains a lady and the other a tiger, what happens then?" asked the prisoner.

"In that case, it makes quite a difference which room you choose, doesn't it?"

"How do I know which room to choose?" asked the prisoner.

The king pointed to the signs on the doors of the rooms:

I

IN THIS ROOM THERE
IS A LADY, AND IN
THE OTHER ROOM
THERE IS A TIGER

II

IN ONE OF THESE ROOMS
THERE IS A LADY, AND
IN ONE OF THESE ROOMS
THERE IS A TIGER

"Is it true, what the signs say?" asked the prisoner.

"One of them is true," replied the king, "but the other one is false."

If you were the prisoner, which door would you open (assuming, of course, that you preferred the lady to the tiger)?

2 • The Second Trial

And so, the first prisoner saved his life and made off with the lady. The signs on the doors were then changed, and new occupants for the rooms were selected accordingly. This time the signs read as follows:

I
AT LEAST ONE OF THESE
ROOMS CONTAINS A LADY

II
A TIGER IS IN
THE OTHER ROOM

"Are the statements on the signs true?" asked the second prisoner.

"They are either both true or both false," replied the king. Which room should the prisoner pick?

3 • The Third Trial

In this trial, the king explained that, again, the signs were either both true or both false. Here are the signs:

I
EITHER A TIGER IS IN
THIS ROOM OR A LADY IS
IN THE OTHER ROOM

II
A LADY IS IN
THE OTHER ROOM

Does the first room contain a lady or a tiger? What about the other room?

THE SECOND DAY

"Yesterday was a fiasco," said the king to his minister. "All three prisoners solved their puzzles! Well, we have five trials coming up today, and I think I'll make them a little tougher."

"Excellent idea!" said the minister.

Well, in each of the trials of this day, the king explained that in the lefthand room (Room I), if a lady is in it, then the sign on the door is true, but if a tiger is in it, the sign is false. In the righthand room (Room II), the situation is the opposite: a lady in the room means the sign on the door is false, and a tiger in the room means the sign is true. Again, it is possible that both rooms contain ladies or both rooms contain tigers, or that one room contains a lady and the other a tiger.

4 • The Fourth Trial

After the king explained the above rules to the prisoner, he pointed to the two signs:

I BOTH ROOMS CONTAIN LADIES II BOTH ROOMS CONTAIN LADIES

Which room should the prisoner pick?

5 • The Fifth Trial

The same rules apply, and here are the signs:

I

AT LEAST ONE ROOM
CONTAINS A LADY

II

THE OTHER ROOM CONTAINS A LADY

6 • The Sixth Trial

The king was particularly fond of this puzzle, and the next one too. Here are the signs:

T

IT MAKES NO DIFFERENCE
WHICH ROOM YOU PICK

II

THERE IS A LADY
IN THE OTHER ROOM

What should the prisoner do?

7 • The Seventh Trial

Here are the signs:

I

IT DOES MAKE A
DIFFERENCE WHICH
ROOM YOU PICK

II

YOU ARE BETTER
OFF CHOOSING THE
OTHER ROOM

What should the prisoner do?

8 • The Eighth Trial

"There are no signs above the doors!" exclaimed the prisoner.

"Quite true," said the king. "The signs were just made, and I haven't had time to put them up yet."

"Then how do you expect me to choose?" demanded the prisoner.

"Well, here are the signs," replied the king.

THIS ROOM CONTAINS

A TIGER

BOTH ROOMS

TIGERS

"That's all well and good," said the prisoner anxiously, "but which sign goes on which door?"

The king thought awhile. "I needn't tell you," he said. "You can solve this problem without that information.

"Only remember, of course," he added, "that a lady in the lefthand room means the sign which should be on that door is true and a tiger in it means the sign should be false, and that the reverse is true for the righthand room."

What is the solution?

THE THIRD DAY

"Confound it!" said the king. "Again all the prisoners won! I think tomorrow I'll have *three* rooms instead of two; I'll put a

lady in one room and a tiger in each of the other two rooms. Then we'll see how the prisoners fare!"

"Excellent ideal" replied the minister.

"Your conversation, though flattering, is just a bit on the repetitious side!" exclaimed the king.

"Excellently put!" replied the minister.

9 • The Ninth Trial

Well, on the third day, the king did as planned. He offered three rooms to choose from, and he explained to the prisoner that one room contained a lady and the other two contained tigers. Here are the three signs:

I II III

A TIGER A LADY A TIGER
IS IN IS IN IS IN
THIS ROOM THIS ROOM ROOM II

The king explained that at most one of the three signs was true. Which room contains the lady?

10 + The Tenth Trial

Again there was only one lady and two tigers. The king explained to the prisoner that the sign on the door of the room containing the lady was true, and that at least one of the other two signs was false.

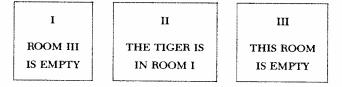

Here are the signs:

I	11	Ш
A TIGER IS IN ROOM II	A TIGER IS IN THIS ROOM	A TIGER IS IN ROOM I

What should the prisoner do?

11 + First, Second, and Third Choice

In this more whimsical trial, the king explained to the prisoner that one of the three rooms contained a lady, another a tiger, and the third room was empty. The sign on the door of the room containing the lady was true, the sign on the door of the room with the tiger was false, and the sign on the door of the empty room could be either true or false. Here are the signs:

Now, the prisoner happened to know the lady in question and wished to marry her. Therefore, although the empty room was preferable to the one with the tiger, his first choice was the room with the lady.

Which room contains the lady, and which room contains the tiger? If you can answer these two questions, you should have little difficulty in also determining which room is empty.

LADIES OR TIGERS?

THE FOURTH DAY

"Horrible!" said the king. "It seems I can't make my puzzles hard enough to trap these fellows! Well, we have only one more trial to go, but this time I'll really give the prisoner a run for his money!"

12 • A Logical Labyrinth

Well, the king was as good as his word. Instead of having three rooms for the prisoner to choose from, he gave him nine! As he explained, only one room contained a lady; each of the other eight either contained a tiger or was empty. And, the king added, the sign on the door of the room containing the lady is true; the signs on doors of all rooms containing tigers are false; and the signs on doors of empty rooms can be either true or false.

Here are the signs:

I 11 Ш THE LADY EITHER SIGN V IS IN AN THIS ROOM IS RIGHT ODD-NUMBERED IS EMPTY OR SIGN VII ROOM IS WRONG IV V VISIGN I EITHER SIGN II SIGN III IS WRONG OR SIGN IV IS WRONG IS RIGHT

IX VIII VII THIS ROOM THIS ROOM CONTAINS **CONTAINS** THE LADY A TIGER A TIGER IS NOT IN AND VI ROOM I AND ROOM IX IS WRONG IS EMPTY

The prisoner studied the situation for a long while.

"The problem is unsolvable!" he exclaimed angrily. "That's not fair!"

"I know," laughed the king.

"Very funny!" replied the prisoner. "Come on, now, at least give me a decent clue: is Room Eight empty or not?"

The king was decent enough to tell him whether Room VIII was empty or not, and the prisoner was then able to deduce where the lady was.

Which room contained the lady?
